

ROME, INC.

Addenda as of Mar. 15th, 2022

The Rules:

3.1 Overview (correction): This should say, "There are 15 Leader counters and 45 War counters..."

6.1.5 (correction): The first sentence should read, "Imperial Statesmen have their name in purple and are ranked from Augustus on the top left of the Emperors Chart to Carinus on the bottom right (Section 10.4)".

6.2.4 Example (correction): The counter image and text for Statesman Tiberius should show and state an Illyrian War special ability instead of a Pannonian War.

8.1.2 (correction): Near the top of Page 8 in the rules note that there are two cases identically numbered as 8.1.2.

9.5 Example (correction): For "Frisia" read "Germania Superior" instead.

10.7.5 (addition): If a Fleet in a Province in Syria with a Sun icon is forced to Transfer due to a Revolt, and there is no Roman or Insurgent Province in Syria with a Sun icon, it is Dismissed instead. Place in the Barracks Box (Section 11.3).

11.2.9 Example (correction): The counter image and text for this example should show and say Statesman "Plautius" and not "Paulinus".

The Scenarios:

General Play Note: While Legions, Auxilia, etc. are limited to what the scenario gives you (same with Wars), a player may create extra Insurgent, Veteran Allied, Allied, and Barbarian counters if needed.

14.0 (correction): Pay should be 80, not 79.

17.0 (correction): Pay should be 276, not 273.

The PACs:

10.4 Emperor's Chart (addition): Insert in the Antonine Emperors' entries "Add Fleet icon to Africa (Case 10.1.6)."

Page 2 (correction): Due to a printing mishap, in some copies of the magazine on page 2 of the PACs there are some game tables with blank cells. Download the correct version of the page by clicking this link:

<http://www.atomagazine.com/extras/53PACsample.pdf>

A complete set of correctly printed PAC pages was included in the center of all copies of the 2019 ATO Annual as well.

The Counters:

Tiberius (correction): In some copies of game, this Statesman's counter had "Pannonian" printed in place of the correct "Illyrian" War special ability (note that Illyrian matches what's printed on the map and the war counter, but not for him in some cases). A replacement counter was published in ATO #54 (Monty's D-Day). Or use this replacement image below to update your piece if you need to.
